DETAILED ACTION

Specification

1. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Art Unit: 2873

2. The abstract of the disclosure is objected to because It should be separate page and less than 150 words. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Kato et al 4,702,567).

Regarding claim 1, Kato discloses (refer to figures 3 and 4) a zoom lens having at least a front lens group (V1) and a controllable lens group (i.e., a controllable lens group such as V2,C), characterized in that the controllable lens group comprises two lens elements which are made of different lens materials and are movable with respect to each other (Example 1) for focusing the zoom lens without displacing the front lens group (V1) (column 4, lines 66-68, column 5, lines 1-23).

Regarding claim 2, Kato discloses (refer to figure 1) a zoom lens having a lens stop characterized in that the lens stop is arranged near the first lens element of the

Art Unit: 2873

controllable lens group (i.e., a controllable lens group such as F1 and F2) and is movable together with this lens group (as shown in figure 3)).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kato et al (4,702,567) in view of Jo et al (6,844,989 B1).

Regarding claim 7 as applied to claim 1, Kato et al discloses all of the claim limitations except a camera. However, Jo et al discloses a camera with the lens system (column 1, lines 14 – 17).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide a camera in to Kato lens system for the purpose of a lens system with a high performance and compact structure as taught by Jo et al (column 1, lines 9 – 11).

Regarding claim 8 as applied to claim 7, Kato et al discloses all of the claimed limitations except hand – held apparatus comprising input means, information processing means, display means. However, Jo et al discloses a mobile information terminal, a liquid crystal monitor means, an image pickup device including CCD.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide a mobile information terminal with a liquid crystal monitor and an image pickup device such as CCD in to the Kato les system for the purpose of a lens system with a high performance and a compact structure (column 1, lines 9 – 11).

Allowable Subject Matter

5. Claims 3-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to teach a folding mirror arranged between the front lens group and the controllable lens group and a second folding mirror which is arranged behind the controllable lens group.

Art Unit: 2873

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The closest prior art as follows: Tanaka et al (4,840,468) a focusing method for zoom lens.

Terasawa et al (5,136,431) discloses a zoom lens of the internal focus type.

Response to Arguments

8. Applicant's arguments with respect to claims 1,2,7 and 8 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mohammed Hasan whose telephone number is (571) 272-2331. The examiner can normally be reached on M-TH, 7:00 AM to 5:30 PM.
